

NOTES ON THE LIGNEOUS PLANTS DESCRIBED BY
H. LEVEILLE FROM EASTERN ASIA

ALFRED REHDER

ADDITIONS AND CORRECTIONS¹

Populus Bonatii Léveillé. — Rehder in Jour. Arnold Arb. **10**: 112 (1929). — Add: Handel-Mazzetti, Symb. Sin. **7**: 59 (1929).

Populus adenopoda Maximowicz. — Rehder in op. cit. **17**: 65 (1936). — Add as synonym:

Populus rotundifolia var. *macranthela* (Léveillé & Vaniot) Léveillé, Fl. Kouy-Tchéou, 380 (1915); Cat. Pl. Yun-Nan, 250 (1917).

Salix amygdalina var. **nipponica** (Franch. & Sav.) Schneider. — Rehder in op. cit. **10**: 113 (1929).

Salix triandra var. *discolor* "Andersson" ex Nakai, Fl. Kor. Sylv. **18**: 87, t. 11 (1930), vix Andersson

Nakai l. c. enumerates *S. Kinashii* Lévl. together with *S. amygdalina* var. *nipponica* as a synonym of *S. triandra* var. *discolor* [= *S. amygdalina* var. *glaucophylla* (Ser.) Seemen] but it seems doubtful if var. *discolor* is identical with var. *nipponica* which differs in the leaves being pubescent when young and usually smaller and narrower.

Salix koreensis Andersson. — Rehder in op. cit. **10**: 114 (1929). — Nakai in Bull. Soc. Dendr. France, **1928**: 51; Fl. Kor. Sylv. **18**: 164, t. 38 (1930).

Salix pseudo-lasiogyne Léveillé in Fedde, Rep. Spec. Nov. **10**: 436 (1912). — Nakai in Bull. Soc. Dendr. France, **1928**: 47; Fl. Kor. Sylv. **18**: 168, t. 39 (1930).

Nakai (l. c.) enumerates *S. Feddei* Lévl., *S. pogonandra* Lévl., *S. pseudo-Gilgiana* Lévl., and *S. pseudo-jessoensis* Lévl., as synonyms, but considers *S. pseudo-lasiogyne* a distinct species which seems to differ chiefly in its linear-lanceolate to lanceolate leaves, but is hardly specifically different.

Salix hallaisanensis Léveillé in Fedde, Rep. Spec. Nov. **10**: 435 (1912). — Nakai in Tokyo Bot. Mag. **32**: 30 (1918); in Bull. Soc.

¹Continued from Vol. **18**: 206-257.

Dendr. France, 1928: 46; Fl. Sylv. Kor. 18: 129, t. 24 (1930). — Mori, Enum. Cor. Pl. 110 (1922).

Salix caprea "Linnaeus" ex Schneider in Sargent, Pl. Wilson. 3: 149 (1916). — Rehder in Jour. Arnold Arb. 10: 116 (1929). — Vix Linné.

Salix hallaisanensis var. *nervosa* Lévillé, l. c.

Nakai (l. c.) takes up Lévillé's name for the plant of northeastern Asia referred by most authors to *S. caprea*. He states that it differs from typical *S. caprea* in having longitudinal striations on the wood under the bark. Such elevated striations are present on the wood of 2-5-year-old branches in *S. aurita* L. and *S. cinerea* L., but are lacking in *S. caprea*. Nakai also refers to *S. hallaisanensis* as *S. hallaisanensis* var. *orbicularis* (Anderss.) Nakai, the Kamschatkan *S. Hultenii* Floderus.

Salix Blinii Lévillé. — Rehder in op. cit. 10: 117 (1929). — Nakai in Bull. Soc. Dendr. France, 1928: 46, 51; Fl. Sylv. Kor. 18: 106, t. 18 (1930).

Nakai refers as Schneider did, *S. Taquetii* Lévl. as a synonym to *S. Blinii* and figures of the latter a sterile branch and a branch with pistillate flowers.

Salix Gilgiana Seemen, Salic. Jap. 59, t. 13a-d (1903). — Lévillé in Bull. Intern. Acad. Géog. Bot. 16: 145 (1906). — Nakai, Fl. Sylv. Kor. 18: 112, t. 19 (1930).

Salix gymnolepis Lévillé & Vaniot in Fedde, Rep. Spec. Nov. 3: 22 (1907). — Matsumura, Ind. Pl. Jap. 2, pt. 2: 10 (1912).

Salix purpurea L. subsp. *gymnolepis* (Lévl.) Koidzumi in Tokyo Bot. Mag. 27: 267 (1913).

Salix Makinoana Seemen, p. p.

Nakai refers *S. gymnolepis* Lévl., which was placed by Schneider under *S. Makinoana* Seemen as a synonym, to *S. Gilgiana*. He also cites *S. Makinoana* Seemen, p. p., as a synonym of *S. Gilgiana*. I cannot see any difference between *S. gymnolepis* Lévl. represented in this herbarium by an isotype, and Nakai's illustration of *S. Gilgiana*, nor with the specimens of that species in this herbarium. *Salix Makinoana* is not represented in this herbarium; as long as its staminate flowers are unknown, its position must remain doubtful.

Quercus glandulifera Blume, Mus. Bot. Lugd.-Bat. 1: 295 (1850).

Quercus serrata Thunberg. — Rehder in op. cit. 10: 120 (1929).

Quercus coreana Lévillé.

Since *Quercus serrata* Thunb. is being proposed as a nomen ambiguum and will in all probability be accepted as such, the correct name for this species will be *Q. glandulifera* Bl.

Cudrania tricuspidata (Carr.) Bureau in Lavallée, Arb. Segrez. 243 (1877).

Vanieria tricuspidata (Carr.) Hu. — Rehder in op. cit. 17: 72 (1936).
Morus integrifolia Léveillé & Vaniot.

Since *Cudrania* Tréc. has been proposed as a nomen conservandum and was accepted by a majority vote of the former Committee (cf. Internat. Rules Bot. Nomencl. ed. 3, p. 133, no. 1942. 1935), a vote which will doubtless be finally confirmed, the valid name of the genus will be *Cudrania*.

Lindera communis Hemsley in Jour. Linn. Soc. Bot. 26: 387 (1891).

Benzoin commune (Hemsl.) Rehder in op. cit. 1: 144 (1919); 10: 194 (1929). — Allen in Jour. Arnold Arb. 17: 330 (1936).

Since *Lindera* Thunb. has been proposed as a nomen conservandum and was accepted by a majority vote of the present Committee (cf. Internat. Rules Bot. Nomencl., ed. 3, p. 134, no. 2821. 1935) this and the two following species will be transferred to *Lindera*, and the synonyms *Litsaea Esquirolii* Lév., *Litsea Cavaleriei* Lév., *Lindera Bodinieri* Lév. and *L. yunnanensis* Lév. will be referred to *Lindera communis*.

Lindera glauca (Sieb. & Zucc.) Blume, Mus. Bot. Lugd.-Bat. 1: 325 (1850).

Benzoin glaucum Siebold & Zuccarini. — Rehder in op. cit. 10: 195 (1929). — Allen in op. cit. 17: 331 (1936).
Pirus brunnea Léveillé.

Lindera megaphylla Hemsley in Jour. Linn. Soc. Bot. 26: 389 (1891).

Benzoin grandifolium Rehder in op. cit. 1: 145 (1919).
Benzoin touyunense (Lév.) Rehder in op. cit. 10: 194 (1929), pro parte.
Benzoin touyunense f. *megaphyllum* (Hemsl.) Rehder in op. cit. 11: 158 (1930). — Allen in op. cit. 17: 331 (1936).

Under the genus *Lindera*, the oldest specific epithet *L. megaphylla* remains valid, but in transferring the species to *Benzoin*, the epithet had to be changed on account of the older homonym *B. megaphyllum* Kuntze.

Lindera megaphylla f. **touyunensis** (Lév.), comb. nov.

Litsea touyunensis Léveillé in Fedde, Rep. Spec. Nov. 11: 63 (1912); Fl. Kouy-Tchéou, 220 (1914).
Benzoin touyunense (Lév.) Rehder in op. cit. 10: 194 (1929); 11: 158 (1930). — Allen in op. cit. 17: 331 (1936).

This form differs from typical *L. megaphylla* in the pubescent underside of the leaves and is, as I have stated (l. c. 11: 158–159) less widely distributed than the typical glabrous form.

Dumasia villosa De Candolle. — Rehder in op. cit. **13**: 330 (1932); **18**: 208 (1937). — Handel-Mazzetti, Symb. Sin. **7**: 578 (1933). — Add as a synonym:

Apios Martini Léveillé, Fl. Kouy-Tchéou, 225 (1914).

CHINA. K w e i c h o u : Gan-pin, haies, *L. Martin* in herb. *Bodinier* no. 1825, Aug.–Sept. 1897 (holotype of *Apios Martini*; ex Léveillé et ex Handel-Mazzetti).

Apios Martini was identified with *Dumasia villosa* by Handel-Mazzetti who saw the type.

Campylotropis polyantha (Franch.) Schindler. — Rehder in op. cit. **13**: 329 (1932).

For *Lespedeza dichromocalyx* read:

Lespedeza dichromoxylon Léveillé, Fl. Kouy-Tchéou, 236 (1914);
Cat. Pl. Yun-Nan, 157 (1916).

Also in the enumeration of specimens line 2, 4 and 6, change *L. dichromocalyx* to *L. dichromoxylon*.

Pueraria Thunbergiana (Sieb. & Zucc.) Benth. — Rehder in op. cit. **13**: 331 (1932).

For *Pueraria coerulea* read:

Pueraria caerulea Léveillé & Vaniot in Bull. Soc. Bot. France, **55**: 427 (1908).

Iodes ovalis Blume. — Rehder in op. cit. **15**: 2 (1934).

For *Vitis Seguini* . . . read as follows:

Vitis Seguini Léveillé, Fl. Kouy-Tchéou, 28 (1914), pro parte, specimine typico exclud.

Buddleia officinalis Maxim. f. **albiflora** (Lévl.) comb. nov.

Buddleia Mairei f. *albiflora*, Léveillé, Cat. Pl. Yun-Nan, 171 (1916).

Buddleia acutifolia C. H. Wright f. *albiflora* (Lévl.) Rehder in op. cit. **18**: 234 (1936).

Alstonia Mairei Léveillé. — Rehder in op. cit. **18**: 235 (1937).

Léveillé in his Cat. Pl. Yun-Nan, 279 (1917), refers *A. Mairei* as a synonym to *A. venenata* R. Br. which belongs to a different section.

Triosteum himalayanum Wallich. — Léveillé, Cat. Pl. Yun-Nan, 281 (1917). — Johnston in Jour. Arnold Arb. **18**: 21 (1937). — Rehder in op. cit. **18**: 250 (1937).

Echium connatum Léveillé.

Vernonia arborea Hamilton. — Gagnepain in Bull. Soc. Bot. France, **67**: 364 (1921). — Rehder in op. cit. **18**: 250 (1937).

Vernonia Vanioti Léveillé.

Vernonia volkameriaefolia DeCandolle. — Gagnepain in op. cit.

67: 363 (1921). — Rehder in op. cit. 18: 250 (1937).

Vernonia Esquirolii Léveillé.

Vernonia saligna DeCandolle. — Gagnepain in op. cit. 67: 363, 364 (1921). — Rehder in op. cit. 18: 250 (1937).

Vernonia Martini Vaniot.

Vernonia Seguini Vaniot.

Vernonia arbor Léveillé. — Gagnepain in op. cit. 67: 363 (1921).

Vernonia papillosa "Franchet" ex Rehder in op. cit. 18: 251 (1937), quoad syn. *V. Arbor* Lévl.; non Franchet.

Vernonia extensa DeCandolle. — Gagnepain in op. cit. 67: 363 (1921). — Rehder in op. cit. 18: 252 (1937).

Vernonia subarborea Vaniot.

Conyza viscidula Wall. ex DeCandolle. — Gagnepain in op. cit. 67: 363 (1921). — Rehder in op. cit. 18: 252 (1937).

Blumea conyzoides Léveillé.

Inula indica L. var. **hypoleuca** Handel-Mazzetti, Symb. Sin. 7: 1107 (1936).

Aster lofjouensis Léveillé & Vaniot. — Rehder in op. cit. 18: 252 (1937).

According to Dr. Handel-Mazzetti (in litt.) *Aster lofjouensis* is identical with his *Inula indica* var. *hypoleuca*.

Senecio spelaeicola (Vant.) Gagnepain in Bull. Soc. Bot. France, 67: 364 (1921) "spelaeicolus," in nota.

Senecio Walkeri "Arnott" ex Gagnepain in op. cit. 67: 363 (1921). — Rehder in op. cit. 18: 253 (1937). — Quoad syn. *Vernonia spelaeicola*; non Arnott.

Vernonia spelaeicola Vaniot. — Vide Rehder l.c.

In a foot-note, Gagnepain states that *Vernonia spelaeicola* in the Museum herbarium is his *Senecio spelaeicola* and that the labels in the Léveillé herbarium had been interchanged. Doctor Handel-Mazzetti informs me (in litt.) that his *Senecio yalungensis* (Symb. Sin. 7: 1124) is a synonym of *S. spelaeicola*. The name *Senecio spelaeicola* does not appear in Index Kewensis.

Senecio Hoi Dunn in Jour. Linn. Soc. Bot. 35: 506 (1933).

Senecio Walkeri "Arnott" ex Gagnepain in op. cit. 67: 363 (1921). — Rehder in op. cit. 18: 253 (1937). — Quoad syn. *Vernonia Esquirolii*; non Arnott.

Vernonia Esquirolii Vaniot. — Vide Rehder, l.c.

According to Doctor Handel-Mazzetti (in litt.) *Vernonia Esquirolii* is identical with *Senecio Hoi* Dunn.

INDEX
TO
NOTES ON THE LIGNEOUS PLANTS DESCRIBED BY
H. LEVEILLE FROM EASTERN ASIA¹

ALFRED REHDER

The Index contains all Lévillé's names mentioned in the "Notes on the ligneous plants described by Lévillé from Eastern Asia," beginning in Vol. 10 (1929) and concluded in the present number. The majority of these names proved to be synonyms and these are followed by the name considered correct with reference to the page or pages of Vols. 10-18 of this Journal where the identification was published or additional information given. Author citations are appended to the names, so that the Index can be used to ascertain the identification without looking up the original publication which only needs to be consulted for the discussions and further statements and details. The author citations have been made more complete by the insertion of the parenthetical author citation which was not yet obligatory when most of the notes were published.

Synonyms are printed in *italics*; accepted names in roman.

- Abelia Bodinieri* Lévl. = *A. myrtilloides* Rehd. 16:334
 — *Cavaleriei* Lévl. 16:335
 — *deutziaefolia* Lévl. = *A. Schumannii* (Graebn.) Rehd. 16:334
 — *Mairei* Lévl. = *A. Schumannii* (Graebn.) Rehd. 16:334
 — *parvifolia* "Hemsl." ex Lévl., non Hemsl. = *A. myrtilloides* Rehd.
 16:334
